Update February 2021

This technical rider describes the ideal conditions for hosting the show.
Do not hesitate to contact us if your reception conditions are different.
We will find together solutions in order for the show to run smoothly.

Florence Goguel : +33 6 72 72 61 85 / Gilles Robert : +33 6 81 43 54 87

Stage

Optimum dimensions: 6 m wide and 5 m deep

Minimum dimensions: 5 m wide by 4 m deep

Complete darkness required

Power supply

You will provide European standard sockets

A 230V / 16A socket, upstage

You must provide a transformer : (1500 W in 220 Volt).

Technical

Light : We will come with our own lighting equipment, we just need (if possible) :

- 1 Spotlight PC 1000 Watt
- 1 lighting stand (boom)

The light is run directly by the artists. The light stand will be set up behind the audience, 5 to 8 meters from the edge of the stage.

It is preferable that the scenery be at the same level as the audience (not on a stage)

Sound

Acoustic show. In case there is a special request for larger gauge (150 max), please provide a little PA system, adapted to the venue. No monitors needed. We could bring our personal microphones if necessary.

Get in / Get out time

The stage must be cleared upon the team's arrival.

Set up: 2 hours 30.

Get out: 1 hour 15

Duration of the show : 30 minutes.

Audience

- 60 to 80 people (depending on the venue).

If no bleacher seatings, you must create tiers : at least 3 heights of different seating. For example: floor mat, then small benches/chairs, then chairs.

- Special request for higher gauge (150 max) is possible only if bleacher seatings.

Hospitality

Please provide hot and cold drinks, dried fruits and towels.
